

**MITSUBISHI MARINE**

# S6A3

**OUTPUT · MARINE GEN-DRIVE · 365~475 kW**  
**OUTPUT · MARINE PROPULSION · 483~657 HP**

## MARINE PROPULSION AND GEN-DRIVE ENGINES

### *Economic Operation*

All Mitsubishi engines are designed and built to deliver performance, dependability and fuel efficiency. From the combustion chamber design to the fuel injection technology, to the turbocharger and the advanced cooling system...everything has been perfectly balanced to provide highly reliable operation and optimum fuel consumption across the entire power curve.

### *Easy Maintenance*

With Mitsubishi's S6A3 marine engine, maintenance is very easy. Each cylinder has its own cylinder head and the engine has large inspection covers on the crankcase and oil pan. No auxiliary component requires separate lubrication, whether it's the fuel injection pump, the governor, the water pump or the turbocharger.

### *Approved by All Major Classification Societies*

At our ISO certified manufacturing facilities, every Mitsubishi S6A3 diesel engine is built to meet the highest quality standards, as recognized by Lloyd's Register of Shipping and other major international marine classification societies.

### *Environmental Compatibility*

Mitsubishi offers a full compliment of engines meeting both IMO and EPA emissions standards.

### *Local Support Around The Globe*

A team of support specialists is available worldwide to ensure that service and maintenance are performed without delay.
