Western Canadian Owned and Operated

Over 32 years in business in Western Canada. Local ownership with an understanding of market needs and customer requirements. This “Pride in Ownership” resonates through each of our branches.

The Right Size

Frontier Power is the right sized company. We are the Western Canadian distributor for the Funk and Transfluid product lines. We carry inventory of common components at our various locations throughout Western Canada. We work closely with our customers and dealer network in forecasting their ongoing requirements. We listen to our customers and respond promptly.

Industry Standard

Deere/Funk and Transfluid products have been successful in many applications including mining, petroleum, construction, agriculture, railway, marine and forestry to name a few. Funk is a US-based manufacturer with over 50 years of design and manufacturing experience. Transfluid is a European manufacturer, in business since 1957. Both companies are recognized in the North American market as quality manufacturers.

Customized Power

Products include fluid and flex couplings, pump drives, clutches, transmissions, planetary gear drives, axles and variable speed drives. Products range from 1 to 4,700 hp providing one of the largest selections in the market today. Purchase loose components or order the full power unit (e.g., engine and drive unit mounted on a skidbase to your specifications). We also work closely with OEMs to single source the complete package, shipped right to the job site!

Design Support

We provide our customers with standard “off the shelf” products or engineered for your specific requirements. Our factory trained technical sales staff and local engineering team provide product and installation assistance. Factory engineering is also available for new application approvals.

Product Support

We have a genuine concern for our customers and the operation of the products we sell. To support our customers we offer:

- Customer support plans in partnership with end user.
- In house technical support through Deere/Funk and Transfluid networks.
- Parts inventory throughout Western Canada and online parts to shop 24/7 and on your time.
- Branch and dealer service support network.

Expertise

As one of the largest independent engine distributors in Canada, we have the expertise with engines and their driven components. We have been adding an average of 600 new customers each year for the past 10 years. With over 800 person-years of experience at Frontier Power we understand your application.
